### M-iClean U

- ✓ Leak Detection System
- ✓ Water Consumption 0.61 gallons
- ✓ Capacity of 37 racks per hour
- ✓ Operating temperatures

# “ New Innovation in Drinking Water ”

Providing easy access to clean and reliable refilling stations is much more sustainable than serving plastic water bottles. Our solution combining Celli's water system and Meiko's bottle washing system ensures maximum sustainability and efficiency for restaurant's and cafe's. You can now package your own reusable bottle water in-house with the same hygiene levels as bottled water without any of the drawbacks that contribute to climate change.

## Advantages of Water Filling Stations:

### Sustainability:

By eliminating the need for single-use plastic bottles, water filling stations help reduce plastic waste and its negative environmental impact.

### Variety:

The Celli water system provides a number of options such as still, chilled, carbonated, and hot water. Increases your menu offering.

### Storage Cost:

No need to provide space in your refrigeration and stock room. Less inventory cost as well.

### Disposal Cost:

Since you will be using refillable bottles, you no longer have to worry about disposing plastic on a daily basis.

### Water Filling Station

- No logistics needed
- No space in refrigeration needed
- No waste
- Safe and reliable
- No inventory cost

### Plastic Water Bottle

- Travels from far distances
- Takes up refrigeration space
- Generates plastic waste
- Harmful if exposed to heat
- High inventory cost

**COSMETAL | TEX-MIX**

Water dispensers provide a number of options, such as still, carbonated, and hot water, to accommodate the different interests of those in the establishment.

### How much does it cost to start water filling station?

The equipment is expected to cost around P300,000, which includes water filtration, softening, and disinfection. Finding a decent source of water for your business, such as a Deep Well or Nawasa water supply, will cost you P130,000.

#### (Low sales Volume)

P2,500 (100 5-gallon container) estimated sales per day. P75,000 – total sales in a month.

#### (High sales Volume)

Php7,500 (300 5 gallons per day.) – estimated sales per day.

Php225,000 – total sales in a month.

**MEIKO M-iCLEAN UM**

Introducing the Meiko M-iCLEAN UM, Installing the equipment next to your water filling station could maximize space and efficiency.

### How many glass bottles can wash using M-iClean Um?

This is no problem with our new bottle rack system for the M-iClean UM undercounter dishwashing machine. 16 glass bottles in any standard size or shape, along with carafes can be cleaned in a jiffy—even bottles all the way up to an internal diameter of 114 mm and lab bottles are no problem.

#### 1.) Cycle 1 – for faster cycle

95sec (up to 2 minutes)

#### 2.) Cycle 2 – Standard ware

150sec (up to 2.5 minutes)

#### 3.) Cycle 3 – for heavy duty and most soiled items

210 sec (up to 3.5 minutes)
